CITP 155 – Programming I

Installing Visual Studio Lab

Graded Activity (15 points)

Install Visual Studio 2015 Professional Edition on your Virtual Machine.

- The installation file for Windows is named vs2015.3.pro_enu.iso and can be downloaded from https://go.microsoft.com/fwlink/?LinkId=615434&clcid=0x409. This is a large download which will be time-consuming.
- *NOTE: If you are installing Visual Studio on another operating system, locate the correct download for Visual Studio 2015 Professional.*
- After the download is complete, double-click the .iso file to begin the install.
- Choose the default installation location.
- Choose the default installation which includes C#.
- Do not launch the software until you begin the next lab activity.

Use the Snipping Tool to provide a screen shot of the successful installation.
